

SETRA POLARWOOD DOOR FRAME SOLUTIONS

International
TIMBER

DOOR FRAME SOLUTIONS

Finger jointing

SUPERIOR QUALITY

- Finest quality finger jointed redwood
- Moulding quality finish

DEPENDABLE PERFORMANCE

- Good stability - Incredibly straight
- Reduced distortion, cupping, twist and spring
- Smooth, high quality finish

EASY TO USE

- Easy to cut, nail and glue
- Machines well (High Density)
- Takes stains and lacquers well
- Can be used for a wide range of applications

ENVIRONMENTALLY FRIENDLY

Planted, harvested and produced under the strict guidelines of the Forest Stewardship Council®.

COST EFFECTIVE

- Competitive £ point
- High Throughput
- Reduced Waste
- Improved factory efficiency
- Reduced further processing (filling)

POLARWOOD

International Timber offers the finest Scandinavian grown Pine from carefully managed and certified forests. Our products are sourced through our partners who process only the best quality logs, ensuring the highest quality timber.

Polarwood is ideal for door frame manufacture and also offers a solution for a wide range of other joinery applications.

Polarwood is a solid redwood board which is selected to remove loose knots, shake and wane to provide a 3 sided board which is ideal for the door frame industry. These selected pieces are then finger jointed to further improve the performance of the board.

Finger Jointing is recognised as the most stable method of joining timbers together. By using Finger Jointing, it is possible to produce pieces of sawn timber that offer improved stability, fewer knots and an incredibly straight board.

“Having been in the joinery manufacturing industry for over 30 years and experienced most species and applications, I only wish I had discovered Polarwood sooner. It's not only improved our manufacturing efficiencies but also our end products”

RANGE AVAILABLE

Size (mm)	Lengths available (m)	Description
38 x 100 (34 x 96)	3.9m	Selected solid FJ Redwood
38 x 125 (36 x 123)	5.4m	Selected solid FJ Redwood
50 x 115 (48 x 113)	5.4m	Selected solid FJ Redwood
50 x 125 (48 x 123)	5.4m	Selected solid FJ Redwood
50 x 150 (48 x 148)	5.4m	Selected solid FJ Redwood
38 x 250 (34 x 240)	5.4m	Selected solid FJ Redwood
50 x 250 (44 x 240)	5.4m	Selected solid FJ Redwood
100 x 100 (90 x 90)	4.2m	PSE
