THE TECHNICAL TIMBER SPECIALISTS

CUSTOMER-FOCUSED SERVICE SOLUTIONS

International Timber is the UK's leading importer and distributor of sustainable timber and panel products. Over the years, we have developed a strong reputation for providing high quality products and services for construction and joinery projects across a wealth of different market sectors.

We are established technical timber specialists, providing our customers with total solutions, all managed to precise individual requirements. Sustainability and responsible sourcing are the foundation stones upon which our business is built.

Look for our FSC®-certified products

At International Timber, we have built up a sector-focused business structured around the needs of our customers.

Our extensive product portfolio encompasses hardwood, softwood, panel and clear softwood products, alongside modified, engineered and composite timbers. We offer a vast array of species and finished products, supported by a comprehensive portfolio of related services.

Operating from six strategically located sites across the UK, International Timber guarantees a robust and reliable supply chain, providing fast and responsive customer service encompassing far more than just stockholding and distribution.

Our specialist services are structured to provide total solutions from milling to machining, lacquering and treating, all managed to precise individual specifications and quality standards.

THE NATURAL CHOICE

PERFORMANCE WINDOWS AND DOORS

Elegant and sustainable timber represents the natural choice for today's windows and doors. The International Timber product portfolio includes a comprehensive range of components and a choice of species, carefully manufactured to ensure the highest standards of quality and performance.

Bringing natural beauty and style to complement both period and modern properties, our window and door components match the challenges of modern life, complemented by our innovative INTelligence approach to further expand choices. Choose wooden windows and doors to add natural beauty to everyday living.

International Timber window components are manufactured to the high standards set by the Wood Window Alliance.

Why choose wood?

- Timber is strong, durable and aesthetically pleasing
- Wood is a natural insulator; the warm characteristics of timber include excellent insulation properties, reducing energy consumption
- Premier quality timber windows and doors naturally enhance and add value to a property, with all the benefits of longevity and low maintenance
- Elegant and functional timber windows and doors provide high levels of security
- Timber is conservation approved for period homes
- Timber is a renewable and recyclable resource, vital for environmental conservation

Today's home owners are increasingly inviting nature back into their living spaces. Choosing timber windows and doors offers all the benefits of 'green living', promoting a sense of wellbeing through connections with the natural world.

THE WINDOW & DOOR PRODUCT PORTFOLIO

Swatches shown in this brochure may differ slightly in colour from actual products. Please request product samples to verify colour.

1. Pine (Pinus sylvestris)

One of the preferred timber choices for windows and doors due to its inherent strength and cost benefits. The International Timber offer is a Scandinavian joinery grade redwood.

2. Sapele (Entandrophragma cylindricum)

Sapele is an incredibly strong and durable hardwood with an attractive reddish brown finish, often chosen when a slightly darker end product is required.

3. Oak (Quercus petraea/robur) (Quercus alba)

A beautiful classic hardwood timber, Oak is strong and durable and an extremely popular choice for windows and doors.

4. Meranti (Shorea)

Sourced from certified Malaysian forests, Meranti presents with an elegant red to dark brown colour and attractive lustrous finish.

Bespoke engineered solutions

International Timber's unique engineered approach means that many other premium species are available within our hardwood range, creating a totally new look and quality feel with 'green' credentials.

We partner with our customers, overcoming traditional sourcing issues by constant product innovation and evolution, matching available engineered products with individual applications.

STANDARD AND BESPOKE OH PANELS

ADDING VALUE: THE INTELLIGENCE RANGE 'EVERYTHING IS POSSIBLE'

The International Timber range includes an extensive range of sandwich panels for door blanks, including bespoke solutions designed and developed to match individual specifications.

Already used by leading joinery companies across the UK, our OH panels provide a competitive, high quality alternative to solid doors, reducing costs without compromising on performance.

The range includes aluminium sheet front and back, insulated cores, raised, flush and acoustic options, providing an attractive, stable and durable finish.

INTELLIGENCE
TOTAL SOLUTIONS IN ENGINEERED TIMBER

Introducing the INTelligence range by International Timber; an infinite collection of solutions developed to match and exceed identified requirements. The objective is to overcome traditional sourcing and availability issues and offer bespoke tailored products.

The INTelligence brand reflects International Timber's established reputation as market leaders, engaging with forward planning and sustainability, engineering solutions using woods that are readily available and fit for purpose for each application.

The INTelligence solution provides a range of benefits for customers.

The product range is conceptual, with solutions evolving working in close cooperation with individual customers to match applications and environments.

COMMITMENT TO QUALITY AND SUSTAINABILITY

Timber is considered one of the most sustainable and environmentally favourable construction materials available. However, illegal timber poses a very real threat to our industry.

Underlining our commitment to environmental sustainability, it is vital for International Timber to ensure that every one of our products is sourced from well managed, credibly certified forests.

We work very closely with our supply chain to ensure that products produced and supplied to the Group meet legislative and social requirements in line with internationally recognised standards.

As an integral part of the global Saint Gobain Building Distribution Group, International Timber has the resource to invest continuously in facilities, stock and advanced production equipment, keeping products and services at the leading edge in terms of technology, efficiency and environmental awareness.

All International Timber sites in the UK are ISO9008, ISO14001, OHSAS18001, FSC® and PEFC® certified.

HIGH PERFORMANCE WINDOWS SHOWCASE THE INTELLIGENCE RANGE

International Timber teamed up with Regal Joinery to complete a bespoke project for Cambridge-based Rose Builders. This project focused on traditional style deep-set windows, finishing at 500mm deep and 5.9m long. The unique and dynamic Intelligence laminated solution provided by International Timber met all dimensional requirements as well as providing a cost-effective way to stabilise the window frame to its original fixture.

The bespoke joinery package on this architected project for a farmhouse extension in Essex demanded wider, larger and far longer dimensioned engineered oak than the market offered. The primary challenge was to source a supply of FSC® certified European Oak capable of providing stability and efficiency, with the natural appearance of the

solid oak not compromised by the introduction of a laminate material. International Timber's Intelligence range successfully matched all requirements.

This project required an exceptional approach to avoid exposed glue lines whilst offering strength to minimise any movement. International Timber's custom-design laminated product met all the specification requirements, including a high-quality colour match. "International Timber's unique Intelligence range offered us a solution that not only provided a good quality timber product, but gave us the confidence to take on more projects like this knowing we had a supplier capable of working with these more demanding specifications," stated a spokesperson for Regal Joinery.
