ENVIRONMENTAL CREDENTIALS

Certification

FSC available

Origin

North America

TECHNICAL INFORMATION**Physical Structure**

Good strength properties

Durability

Durable

Moisture Content

8-10%

Working Qualities

Variable in working properties according to rate of growth, slow grown material provides a smooth finish. Stains and takes nails/screws well

Storage Advice

Product needs to be kept undercover in dry conditions

Wastage Allowance

25 – 40%

Stability

Stable for internal applications, although for external applications if timber is not acclimatised can have a tendency to swell due to low initial moisture content
